PROFESSIONAL SUMMARY

Computer Engineering graduate and IT Associate with experience in systems administration, IT support, web application development and AI-based hardware prototyping. Builds practical systems that reduce manual work and keep infrastructure reliable.

WORK EXPERIENCE

IT Associate, Susumi Philippine Logistics, Inc. July 2026 - Present

- Administered and maintained servers, Microsoft 365 services, workstations, and network infrastructure.
- Provided technical support and troubleshooting for hardware, software, network, printer, and user-related issues.
- Installed and configured computers, peripherals, business applications, and LAN connections.
- Supported CCTV systems, network devices, and IT infrastructure maintenance.
- Prepared IT-related billing, procurement documents, quotations, and technical documentation.
- Managed IT asset inventory, service records, licenses, and documentation.
- Assisted in implementing security measures, system updates, and preventive maintenance.
- Designed, built, and deployed the SPLI Portal, an internal system for leave, approvals, and IT tickets.

IT On-the-Job Training, JGC Technical Assistance Services Philippines, Inc. Jan - Apr 2026

- Assisted in daily IT operations, ensuring efficient management of hardware, software, and user systems.
- Installed and configured computers, peripherals, and necessary software applications.
- Supported network connectivity and resolved basic LAN and internet troubleshooting issues.
- Documented IT procedures, system issues, and security-related incidents.

EDUCATION

BS Computer Engineering, FAITH Colleges 2022 - 2026

THESIS PROJECT

Automated Fire and Smoke Detection with Fire Suppression System

- Developed an AI-based fire and smoke detection system using machine learning and computer vision; measured 83.6% mAP@50, 90.5% precision, 74.4% recall.
- Integrated dual camera input (CCTV and infrared) for improved detection reliability.
- Implemented automatic fire suppression actuation through programmed trigger logic, with a 4.5 to 7 second response.
- Built a real-time monitoring interface on localhost with live camera feeds and system status.
- Performed IP camera calibration, height mapping, and directional monitoring setup.

SKILLS

Python, PHP, MySQL, JavaScript, HTML/CSS, Bootstrap, Microsoft 365, IT Support, Troubleshooting, Networking, Database Management, Arduino, Breadboarding, Electrical Circuit Analysis, Basic Electronics, Technical Documentation, Leadership, Problem Solving, Communication.

ACHIEVEMENTS AND CERTIFICATES

- 2nd Runner-Up, Engineering Camp 2025 (Team Leader)
- CIDRCON 2025 Certificate of Attendance; Simplilearn SkillUP: Introduction to Software Testing, Java Programming for Beginners, What is Software Development?, Design Thinking for Beginners
